## Profile

---

B.Tech Computer Science student passionate about AI-powered software engineering with hands-on experience building scalable full-stack applications using Python, Next.js, FastAPI, MongoDB, and LLM frameworks. Strong foundation in data structures, object-oriented programming, backend development, and modern AI technologies.

## Experience

---

### Software Developer Intern

Jun 2024 – Jul 2024

Xenotix Tech

- Converted UI designs into responsive web applications, ensuring accurate design implementation.
- Developed a logistics-based web module enabling users to manage and track city-to-city shifting services.
- Identified and resolved development issues, improving application efficiency and overall performance.

### Full Stack Developer Intern

Sep 2023 – Mar 2024

Apoliiums Infotech India Pvt. Ltd. (Remote)

- Managed and structured backend data for multiple client projects ensuring accuracy and consistency.
- Coordinated with UI/UX and backend teams to ensure timely updates and data correctness.
- Improved data handling efficiency using structured formats and basic automation techniques.

## Projects

---

### NextRound AI – AI Interview Preparation Platform

[GitHub](#)

- Built a full-stack AI interview platform using Next.js, FastAPI, MongoDB, LangChain, and LangGraph for personalized interview preparation.
- Automated resume analysis, JD matching, skill-gap detection, and LLM-powered interview generation.
- Developed voice-based mock interviews with AI evaluation, hiring-readiness scoring, and JWT authentication.

### CityLens – Civic Issue Reporting Platform

[Live](#) | [GitHub](#)

- Developed a full-stack civic issue reporting platform using Next.js, TypeScript, MongoDB, and Cloudinary with role-based authentication.
- Built interactive map-based issue reporting, image uploads, community upvoting, and an admin dashboard.
- Designed responsive SaaS-style UI with secure backend APIs and scalable data management.

### CliniQ-RAG

- Built a Retrieval-Augmented Generation (RAG) medical QA system using hybrid retrieval (BM25 + semantic search).
- Improved answer quality through query rewriting, re-ranking, and context-aware generation while reducing hallucinations.
- Integrated LangSmith evaluation and source attribution to optimize retrieval accuracy and response latency.

## Skills

---

**Programming:** Python, C++, JavaScript, TypeScript

**Frameworks:** Next.js, React, Node.js, FastAPI

**AI/ML:** LangChain, LangGraph, Hugging Face, OpenRouter, RAG, LangSmith

**Databases:** MongoDB, MySQL, Firebase

**Tools:** Git, GitHub, Docker, Cloudinary, Jira

## Education

---

### B.Tech in Computer Science and Engineering

Aug 2023 – Present

Bennett University

CGPA: 8.21

## Certifications

---

- Database Management Essentials – University of Colorado
- Data Structures – University of California San Diego
