SUMMARY

Results-driven Data Analyst with expertise in data visualization, spatial analysis, and database management. Skilled in transforming complex data into actionable insights, building interactive dashboards, and ensuring data accuracy. Strong team collaborator, committed to continuous learning and staying current with evolving data tools and trends.

EXPERIENCE

Gurgaon
Sep 2022 - Present

Data Associate, Upstream Data process and Management
Wood Mackenzie

- Started by supporting data collection, entry, and quality control, ensuring clean and reliable inputs for internal systems.
- Took ownership of data cleaning, validation, and analysis using Excel, contributing to multiple research and operational projects.
- Progressed to maintaining and enhancing two key databases, focusing on improving data accuracy and supporting business-critical operations.
- Leveraged ArcGIS Pro to lead geospatial data management creating, editing, and analyzing spatial datasets and producing high-quality maps and visualizations.
- Applied these skills in aligning government license map data with internal systems, improving spatial accuracy and decision-making for clients.
- Designed and built interactive Power BI dashboards and reports, helping stakeholders make faster, data-informed decisions.

Feb 2022 - May 2022

Data science interns
APOLIUMS INFOTECH INDIA PRIVATE LIMITED

- Cleaned, visualized, and interpreted data to support business decisions.
- Used SPSS to analyze key metrics and identify performance trends.
- Collaborated on predictive models using statistical and ML techniques.
- Applied machine learning to extract insights from large datasets.
- Created Power BI dashboards from ELT data for actionable reporting.
- Delivered clear insights to highlight KPIs and guide stakeholder decisions.

Apr 2021 - Jun 2021

Business Analyst interns
PRAEDICO GLOBAL RESEARCH PRIVATE LIMITED

- I analyzed the top 5 companies in the IT Sector.
- Used historical data for 2 financial years with the help of Python.
- Engaged in predictive analysis to determine optimal timing for stock sales and holds.
- Conducted comprehensive data analysis to discern patterns and offer strategic insights to inform decision-making.

EDUCATION

Jun 2020 - Jul 2022

Master of Business Administration Business Analytics
Prestige Institute of Management Gwalior, with 8.50 CGPA and Research

Jun 2017 - Jul 2020

Bachelors of Science Computer Science
Vijaya Raje Government Girls College , Gwalior with 7.62 CGPA

LANGUAGES

English

Hindi

SKILLS

Power bi
Data Visualization
Tableau
MS Excel
Strong communication and presentation skills.

Mysql

Arc GIS

PROJECTS

Alignment of Government License Map Data with Internal Database and GIS Systems

- Aligned country-sourced license map data with internal product datasets to ensure spatial and data consistency.
- Created and updated new license blocks in the company database based on government maps.
- Utilized ArcGIS Pro to map and validate block geometries, ensuring high accuracy and representation.
- Conducted thorough data validations and adjustments to maintain data integrity.
- Enhanced overall data quality, directly supporting improved client decision-making.

Project: Upstream Supply Chain (USC) Contract Integration

- Spearheaded the USC initiative by entering upstream contracts into the internal database for structured access.
- Enabled clients to easily review contract data, supporting informed and timely decision-making.
- Improved contract transparency and streamlined internal processes, aligning with the company's strategic goals.
- Contributed to operational efficiency by enhancing data accessibility and reducing manual lookup efforts.

Project: Food Demand Forecasting

- Merged and processed data from four CSV files to build a unified dataset for analysis.
- Applied multiple forecasting models to identify the best-performing approach for predicting food demand.
- Enabled accurate predictions of consumer behavior related to product purchases and service usage.
- Supported data-driven decision-making by improving demand planning and inventory management.

CERTIFICATIONS & COURSES

- Data science project
- Data visualization
- PYTHON for Data Science and Machine Learning Bootcamp
- SQL
