Profile

Detail-oriented B.Tech Computer Science student with strong skills in AI/ML, web development, and data management. Experienced in building real-world applications, handling structured data, and working with cross-functional teams. Proficient in Python, databases, Excel, and modern web technologies. Highly motivated to contribute in fast-paced environments requiring problem-solving, communication, and coordination.

Experience

Software Developer Intern

Jun 2024 – Jul 2024

Xenotix Tech

- Converted UI designs into responsive web applications, ensuring accurate design implementation.
- Developed a logistics-based web module enabling users to manage and track city-to-city shifting services.
- Identified and resolved development issues, improving application efficiency and overall performance.

Full Stack Developer Intern

Sep 2023 – Mar 2024

Apoliums Infotech India Pvt. Ltd. (Remote)

- Managed and structured backend data for multiple client projects ensuring accuracy and consistency.
- Coordinated with UI/UX and backend teams to ensure timely updates and data correctness.
- Improved data handling efficiency using structured formats and basic automation techniques.

Projects

CliniQ-RAG

- Designed and implemented a RAG-based medical QA system using hybrid search (BM25 + semantic search).
- Implemented query rewriting, re-ranking, and context-aware generation improving relevance and reducing hallucination.
- Built an explainable pipeline with source attribution and LangSmith evaluation using local LLMs (Ollama).
- Improved retrieval accuracy with reduced latency and answer relevance over baseline approaches.

Find My Driver

- Developed a platform to connect users with nearby drivers using real-time location tracking.
- Managed user data, ride records, and location details to ensure accuracy and consistency.
- Built dashboards to monitor ride history and analyze user activity efficiently.

Code-Stream

- Built a real-time collaborative coding platform with shared rooms for multiple users.
- Implemented live synchronization using Socket.IO, ensuring instant updates across all connected users.
- Integrated a customizable code editor with syntax highlighting to enhance user experience and collaboration.

Skills

Programming: Python, C++, JavaScript, OOPs

Development: React, HTML, CSS, Node.js, FastAPI

Databases: MySQL, MongoDB, Firebase

Tools & Frameworks: GitHub, Docker, Jira, LangGraph, LangSmith, Microsoft Excel, Google Sheets

Education

B.Tech in Computer Science and Engineering

Aug 2023 – Present

Bennett University

CGPA: 8.24

Certifications

- Database Management Essentials – University of Colorado
- Data Structures – University of California San Diego
- Statistics for Data Science with Python – IBM
- Docker for the Absolute Beginner – Hands-On
